

GLOBAL VEGETATION MONITORING AND MODELING

International Conference
Avignon 3-7 February 2014

<https://colloque.inra.fr/gv2m>

Objectives: Bringing together different communities with focus on land surfaces:

- Earth system modeling (TERRABITES forum)
- Remote sensing (GVM series)
- Global Agriculture Monitoring (GEO-GLAM)

Plenary oral sessions + posters

1. Traits for the modeling of vegetation functioning
2. Land cover and change, fire, water bodies, snow and ice
3. Assimilation (carbon and weathre/climate)
4. Agriculture global monitoring
5. Long time series, trends and anomalies over the past 30 years and continuation
6. Site measurements, scaling, modeling and remote sensing
7. Land ECV available products and new products

Deadline for abstract submission: September 2013
